

Grocery List

We are going to create a grocery shopping website. Almost a comparison to Walmart. In this project, you will utilize ReactJS and Bootstrap to design the website. First, There needs to be a list of items displayed. These items should have a button that adds to a checkout cart. Second , somewhere on your website to show the checkout cart. There should be an option to hide or open the checkout cart. This will keep a list of everything that the user has added and displays the prices. There should be a total and a subtotal displayed in this component.

MAKE SURE TO SUBMIT A DESIGN TO ONE OF THE INSTRUCTORS BEFORE STARTING

Logo		Display hide/open checkout		# Items in cart
Grocery Items				sorting/Filter
Picture Item \$0.00	Picture Item \$0.00	Picture Item \$0.00	Picture Item \$0.00	Checkout Item 1 - \$0.00 Item 2 - \$0.00 Item 3 - \$0.00 Item 4 - \$0.00 Item 5 - \$0.00 Item 6 - \$0.00 Item 7 - \$0.00 Subtotal: \$0.00 Total: \$0.00
Picture Item \$0.00	Picture Item \$0.00	Picture Item \$0.00	Picture Item \$0.00
